ISSUES AND RISKS

There is considerable potential for the MCA to input into the sustainable development agenda given its remit and commitment to ensuring 'Safer Lives, Safer Ships, [and] Cleaner Seas'. While there are clearly several areas of ongoing work around the sustainable development agenda there is no consistency about how these are discussed through the SDAP, and no alignment between them. One example is MCA's aim to promote clean and safe seas through environmentally sustainable shipping. It is something of a missed opportunity that the particulars of achieving this aim are not discussed in more detail and that this SDAP has not been used as a tool to assist in the delivery of this work. Furthermore, the MCA should be thinking more broadly about how its activities impact on society and the environment as the SDAP is rather too focused on MCA's internal operations.

MCA'S RESPONSE

"The Maritime & Coastguard Agency as an executive Agency of the Department for Transport (DfT) is fully committed to implementing the UK Government's Sustainable Development Strategy across all of our Operational Policies and Activities. The Agency has now published two Sustainable Development Action Plans (SDAP's) and has successfully implemented many of the targets and goals set out within them. The Agency recognises that the commitments set out within the 2007-8 SDAP concentrate on the Sustainable Operations on the Government Estates (SOGE) targets and that whilst other areas are examined we now need to consider all elements of Sustainable Development and how the Agency contributes to these through its internal and external operations. Looking ahead the Agency is now developing a three year SDAP to be published in 2009 and is engaging with all Key Stakeholders across the organisation to ensure that all of the elements are addressed and documented and that targets are set within each of the key areas. It is envisaged that with this full Stakeholder engagement together with continued support and guidance from both the Sustainable Development Commission and the DfT the new plan will address many of the comments and suggestions made within the report covering its 2008-9 SDAP, in particular it will clearly demonstrate how the Agency makes a positive contribution towards the overall Sustainable Development Strategy and clearly set out its plans to embed all of the principles and priorities of Sustainable Development into everything it does." (MCA, January 2009).
